STOP THE JOB POLICY

All accidents and incidents are preventable

All visitors, employees and contractors must always follow the Safety and Risk assessment process of the company to prevent accidents or incidents involving people, equipment/property or the environment whilst carrying out work tasks. The STOP THE JOB POLICY is an important part of the safety system within the Company.

All visitors, employees and contractors have the right to stop the job in progress if a risk is observed that could lead to injury, damage to equipment / property or the environment.

You have the right to STOP THE JOB with the knowledge that no retribution or punishment can be imposed on you for stopping the job as long as the policy has been implemented in good faith.

A STOP JOB situation should be reported immediately to the supervisor who in turn will inform the operational management.

A stand down for safety meeting must be held and the task is not to continue until all issues and concerns are reassessed and resolved.
